Experience

Santander Tecnología / Software Engineer

5/2021 - present

I work in the Santander Global Tech team giving support to various projects around the world.

- Refactored an internal tool to monitorize system stats in Java, using Sigar Library, SpringBoot, GIT, Maven, etc.
- Worked in the backend of an app to manage corporate contracts and corporate cards for Santander Spain. SpringBoot, Git, Maven, Openshift, Jenkins, Apache POI, Swagger, RESTful API, etc.

Globant / Java Developer

09/2018 - 05/2021

- Worked in Pogo project for Electronics Arts. Pogo is a web app that hosts lots of games. My work was to develop new functionalities/libraries for the different platforms of Pogo and bug fixing. Java, SpringBoot, Maven-Gradle, P4v-Git, AWS, SonarQube are some of the technologies used in this project. I worked within a framework of continuous integration process with Jenkins-GitLabCI and agile methodologies.
- Developed a tool with Google Script in order to auto generate Slides presentations for the Sales area of Globant.

Education

Technical Degree in Computer Application Development

Universidad Nacional del Centro de la Provincia de Buenos Aires
2020 - present

I started this career to gain more knowledge in different areas of the industry.

So far I have learned about GIT, PHP, JAVA, JS, HTML, and CSS, using these technologies to create various web pages as lecture projects.

Volunteer

Volunteer at Code.org

We participate in activities with children to bring them closer to the world of technology. The proposal is based on making an "Hour of Code" with them so that they get an idea of what programming is.
